Full Stack Developer @ tidy.com

Frontend & Backend | Ruby on Rails | Angular | Ionic | Typescript | Javascript | AWS

Summary

Full Stack Developer at TIDY, with 7 years of experience in developing web applications using Angular and TypeScript. I have also been working on projects using Ruby on Rails, building RESTFUL APIs and Gems for efficient code reuse. In addition I also have some Devops skills, maintaining AWS infrastructure, including continuous code build and integration, S3, and other automations using GitHub Actions. I am passionate about learning new technologies, improving my coding skills, and exploring code architecture techniques. My goal is to continue delivering high-quality software by applying SOLID principles to solutions that meet the needs of users and businesses alike.
